ENERGY EVERYWHERE

# GRUPEL GAS RANGE

The increasing usage of gas on power generation, in industry and at our homes as well, has an impact in the energy production. The gas applications are typically more economical and environmentally friendly.

**Grupel presents its gas-powered generators, with the following characteristics:**

// Use of engines with great reliability using different type of fuels such as like:

Natural Gas // Biogas // LPG/GPL

// Wide range of powers: 5 kW up to 4500 kW, covering all the possible applications

*Grupel's factory is equipped with a Gas Gensets Testing Area, where the Gas Range is fully set up before its shipment.*

## Gas gensets advantages:

- .. The produced electricity may cover the total installation demand and the excess may be exported to the grid as well
- .. The high efficiency of cogeneration and/or trigeneration applications allows savings up to 40% compared to other standard systems, resulting in a ROI much quicker
- .. Emission retail gas toxic and harmful such as: carbon dioxide, sulphur dioxide and nitric dioxide
- .. Acoustic noise levels are lower.

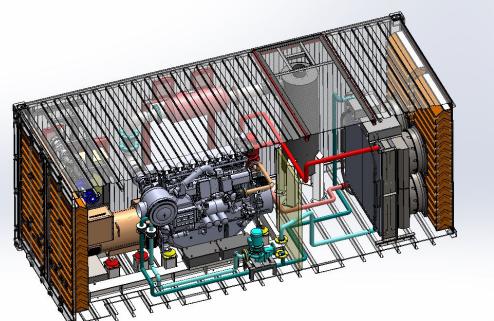

## BASIC SCOPE OF SUPPLY

- .. 4 Stroke combustion engine
- .. Self excited alternator ip21/ip23 class H
- .. Steel baseframe with anti-vibration pads
- .. Cooling radiator or plate heat exchanger
- .. Control panel with measuring devices and control unit
- .. Automatic switch breaker
- .. Gas train ramp fully equipped
- .. Steel residential exhaust system

## OPTIONS

- .. Soundproofed steel protection enclosure and weather protection
- .. Automatic oil level control
- .. Engine pre-heating
- .. stainless steel exhaust system
- .. ATS panel
- .. Remote control
- .. Multiple unit synchronization

# GAS RANGE POWER PLANTS

## Modularity

Modular Power Plants completely installed in ISO20 and/or ISO40 maritime containers. This new design includes the incorporation of many elements needed on the plant in a “Plug-In” mode, thereby increasing the flexibility, quick installation, and better adjustment to the total power output required on each application.

- Better for a future expansion of the power plant
- Reducing the cost of Civil Works
- Better time response on its shipping to site
- Logistics cost reduction
- Much easier to move the entire Power Plant to another site
- Easier maintenance
- Turnkey projects
- Rental
- Private investors

# ABOUT US

**Grupel** began its activity in **1976** where its main activity is the production and commercialization of a wide range of generators (open chassis or soundproof - canopy) equipped with best quality components and with a power range between **3 to 3500kVA**, dedicated to produce energy. Nowadays it has become the largest production unit of Gensets in Portugal, operating in the **5 continents with over 60 countries**. **Grupel** means **flexibility**, as it's perfectly empowered to produce since the standard genset to special projects, that involves a high complexity level of engineering and conception.

In the last years, the growth has been over **25% per year**, which reflects the quality of the generators and the trust of the customers.

**87%** of the company's business volume is currently due to its international presence.
